These are, respectively from left to right: reverse or brake, low speed, second speed, high speed, accelerator. The smaller cut, Fig. 22, shows how the connections of the pedals with the power plant are made. Not all hand levers act alike, as is brought out by the picture of the Stevens-Duryea control levers, Fig. 23. In this, it will be noticed that there is a small pin in the change speed lever, which slides in a slot. Normally it drops into a depression and holds the lever in place. To move the lever, it is necessary to raise this out of the groove. The smaller figure alongside of the levers shows just how this works. As the method of imparting the use and action of these various parts to a novice is of some value, all of the schools teach it in a very thorough manner. Fig. 24 shows a scene in a Parisian school, L ecole Centrale de Paris, where the instructor is demonFig. 23. Side Levers on the Stevens-Duryea Car. Strating to some Students the operation of the control pedals and levers, as just explained. One of the students is working the muffler cut-out. The car is a 40-horse-power Peugeot Equally important is the actual application of this knowledge to the operation of a car. The way in which the latter is imparted is illustrated in Fig. 25 in which an instructor is showing a student how to change gears. STEERING...
